

## The Road to Meaningful Use

Num	Core Objectives and Measures	
1	CPOE (Clinical Provider Order Entry) of medication orders for >30% patients	
2	Drug-drug & drug-allergy interaction check	
3	eRx for >40% permissible Rx's	
4	Demographics per MU specs for >50% patients	
5	Up-to-date problem list with current dx for >80% patients	
6	Active medication list for > 80% patients	
7	Active medication allergy list for > 80% patients	
8	4 key vital signs maintained for >50% patients >2 years old	
9	Smoking status maintained for >50% patients > 13 years old	
10	1 high priority clinical decision support rule	
11	Submit 3 mandatory + 3 selected clinical quality measures to CMS	
12	Electronic copy of health info given to patients who request within 3 days > 50% of the time	
13	Written clinical summaries given to patients, within 3 days, for >50% of all office visits	
14	Perform one test of electronic exchange with another provider	
15	Assure privacy & security by using HIPAA mandated procedures, specifically the risk assessment, plus correction of all deficiencies identified	
	<b>Menu Set (Choose 5, including one marked with *)</b>	
1	Drug-formulary check functionality enabled for 1 or more external drug formulary	
2	Lab test results stored as structured data for >40% of all tests ordered	
3	Minimum of 1 report of patients with specific conditions for QI, outreach, or research	
4	Preventative/follow-up care reminders sent to >20% of either seniors or pediatric patients	
5	Electronic access to health info (lab results, problem list, med lists, med allergies) given to >10% of patients	
6	Patient-specific education resources provided to >10% of patients	
7	Medication reconciliation performed for >50% of care transitions	
8	Summary of care report provided to other provider for >50% of care transitions and referrals	
9*	Perform one test of submission to state immunization registry, with submission if test is successful	
10	Perform one test of EHR's capacity to submit reportable lab results to public health agency, with submission if test is successful	
11*	Perform at least one test of EHR's capacity to provide electronic syndromic surveillance data to public health agencies, and submission if test is successful	

Note: The measures above are abbreviated to include all on one page. See regulations for full text.
